EXPERIENCE

Boeing India Private Limited

Aug 2025 – Present

Software Engineer Apprentice

Chennai, Tamil Nadu

- Designed and developed the STEPS QC Tool (Python, Selenium, multithreading), automating 60% of the manual FCR validation workflow in collaboration with cross-functional engineering teams.
- Developed the **FOCS Tool** using VBA and Excel automation to validate follow-up conditions, reducing processing time from 30 minutes to approximately 5 minutes while improving workflow efficiency and validation accuracy.
- Built scalable Python and Power BI reporting dashboards that automated Excel-based data aggregation, providing real-time throughput and task delivery insights for a 25-member engineering team.

Margsoft Technologies

May 2024 – Jun 2024

Web Development Intern

Lucknow, Uttar Pradesh

- Developed features for the **Yuva Sathi** portal using modern web technologies, providing centralized access to education, entrepreneurship, healthcare, and government services for youth across Uttar Pradesh.
- Contributed to the development of a citizen-facing web portal serving 100,000+ users by implementing lazy loading and performance optimizations, improving user experience, and accessibility to government schemes and digital services.

PROJECTS

WorkForge – Workforce Management System | React.js, Spring Boot, MySQL, JWT | [GitHub](#)

- Built a full-stack workforce management system using React.js, Spring Boot, JWT-secured REST APIs, and MySQL with role-based access control (RBAC) for employee and managers.
- Designed responsive dashboards featuring task tracking, attendance monitoring, filtering, and productivity analytics, improving user experience through an intuitive interface.
- Integrated secure authentication, REST APIs, and relational database design to deliver a scalable and maintainable enterprise application.

Data Analyst Portfolio Project | SQL, Power BI

- Designed a relational database and SQL-based ETL pipeline to clean, transform, and integrate business datasets for reporting and analysis.
- Developed interactive Power BI dashboards to visualize revenue, profit, customer demographics, KPIs, and business performance trends.
- Performed data cleaning, transformation, and exploratory data analysis to generate actionable business insights and support data-driven decision-making.

Attendance Management System | Python, OpenCV, MySQL | [GitHub](#)

- Developed a facial recognition-based attendance management system using Python and OpenCV to automate attendance tracking and reduce manual record management.
- Designed MySQL database schemas for efficient storage, retrieval, and management of attendance records.
- Implemented secure authentication and chatbot-assisted user support to improve accessibility and enhance user experience.

ACHIEVEMENTS & CERTIFICATIONS

- Secured 1st Rank (2nd Year) and 2nd Rank (1st Year) in B.Tech CSE.
- Research paper accepted for presentation at the **IEEE International Conference on Nexus of Digitalization, Intelligence and Applications (ICNDIA 2026)** on a Comparative Study of Windows, MacOS, and Linux.
- NPTEL Database Management Systems (IIT Kharagpur) – **Ranked in the Top 1%**.
- Open Source Contributor – GirlScript Summer of Code (May 2026 – Present).
- Oracle Cloud Infrastructure 2025 AI Foundations Associate (1Z0-1122-25).
- Meta Front-End Developer Professional Certificate.
